

INSTALLATION

Not provided: Screwdriver and Ethernet cables

- 1 **TAKE** apart each piece of the coupler.
- 2 **USE** a screw driver or similar tool to push through the crimp and force out the rubber seal. Set the seal aside for later.
- 3 **SLIDE** the end of the Ethernet cable #1 through the nut before threading the cable through the crimp.

- 4 **SLIP** the rubber seal onto Ethernet cable #1 via the side slit. Push the rubber seal back into the crimp.
- 5 **PLUG** the connector into the barrel and make sure it clicks. Slide the crimp until it is threaded snugly onto the barrel. Screw the nut back onto the crimp and tighten until snug.
- 6 **REPEAT** the process with Ethernet cable #2.
